

PRE-HEALTH PROGRAMS

LEARN TO *Live*

BECOME THE FUTURE OF HEALTHCARE

DO YOU FEEL CALLED TO SERVE OTHERS IN THE FIELD OF HEALTHCARE?

Enroll in a pre-health program to begin a rewarding career of helping others.

Choose from one of our eight Pre-Health tracks as you study your chosen major. In your major, we will customize your prerequisite courses to fulfill the requirements for entry into your graduate healthcare education. You may benefit from one of our many Early Assurance agreements with partner institutions or select the school of your choice.

Your Pre-Health Advisor will help you gain hands-on experience through shadowing or internship experiences in your field. Take practice entrance exams, mock interviews, and workshops to help you feel prepared for entrance into graduate school.

- Optometrists
- Pharmacists
- Physical Therapists
- Physician Assistants
- Professors
- Research Scientists
- Research Directors
- Veterinarians

STUDENT SPOTLIGHT

Autumn Dillow '23 (Biology) graduated from the Pre-PA program.

She currently works as a Patient Care Technician in the Emergency Department of Highland Hospital and is enrolled in the PA program at Mercyhurst University.

She says, "I've learned SO MUCH about myself, about God, and forming Godly friendships. My time here has helped me develop a better sense of who I am and who I want to be. I love my major because I'm just a major science nerd in general and love learning about God's creations. Over the past four years, I have been able to cultivate meaningful relationships with my peers and my professors which has deeply impacted my passion for learning and becoming a PA. My goal is to specialize in cardiothoracic surgery."
